## 5. Accounting Changes

Effective April 1, 2015, THK applied "Revised Accounting Standard for Business combinations" (Statement No. 21, issued by Accounting Standards Board of Japan ("ASBJ") on September 13, 2013), "Revised Accounting Standard for Consolidated Financial Statements" (Statement No. 22, issued by ASBJ on September 13, 2013) and "Revised Accounting Standard for Business Divestitures" (Statement No. 7, issued by ASBJ on September 13, 2013). In applying the new standards, THK recognized the difference associated with changes in equity in subsidiaries remaining under the control of THK as additional paid-in capital, and changed the accounting treatment of acquisition-related costs to the method under which such costs are recorded as expenses for the fiscal year they are incurred. For business combinations implemented on or after the beginning of the three months ended June 30, 2015, the accounting method has been changed to reflect the adjustments to the allocated amount of acquisition costs on the finalization of the provisional accounting treatment in the consolidated financial statements for the quarter period containing the date of the business combinations. In addition, THK changed the presentation manner of net income and other items. In the new presentation manner, minority interests are presented as non-controlling interests. To reflect these changes, certain reclassifications have been made to the consolidated financial statements for the nine months ended December 31, 2014 and for the year ended March 31, 2015.

THK applied the new standards prospectively from the beginning of the three-month period ended June 30, 2015 in accordance with the transitional treatments as prescribed in article 58-2 (4) of Revised Accounting Standard for Business combinations, article 44-5 (4) of Revised Accounting Standard for Consolidated Financial Statements, and article 57-4 (4) of Revised Accounting Standard for Business Divestitures.

As a result, the effect of applying the new standard was to decrease operating income, ordinary

income and income before income taxes for the nine months ended December 31, 2015 each by ¥1,262 million.

## Management's Discussion and Analysis

### 1. Operating results (April 1, 2015 to December 31, 2015)

During this nine-month period, the economic growth in emerging countries such as China slowed down; however, the world economy continued the modest recovery trend which was mainly led by Europe and the United States of America. In Japan, the economy made a mild recovery; however, there were some weaknesses particularly in production and exports.

The THK Group has identified "Full-Scale Globalization" and the "Development of New Business Areas" as cornerstones of its growth strategy to expand the markets of its products such as LM Guide. As to Full-Scale Globalization, while the markets in emerging countries such as China are growing by dint of the factory automation progress, which is also spreading to developed-country users, the THK Group endeavors to expand its global sales network to meet such demand. Regarding Development of New Business Areas, while the THK Group's products are getting widely adopted in new business fields such as medical equipment, aircraft, robot, and renewable energy, the THK Group is working on expanding sales of not only existing products but also new developed products. The THK Group is also committed to increase its sales by strengthening its sales structure and marketing strategy functions.

In the nine-month period, the THK Group operated proactively to expand its sales with its strengthened operating structure on a global scale. Moreover, in order to further expand its transportation equipment business, THK acquired the linkage and suspension business of TRW Automotive Inc. in Europe and North America through a business transfer on August 31, 2015. In relation to this business transfer, THK has included four subsidiaries into the scope of consolidation as THK RHYTHM AUTOMOTIVE ("TRA"). Along with the favorable effect of the weaker yen as compared to the level a year earlier, net sales for the nine-month period amounted to ¥172,733 million, up ¥12,433 million, or 7.8%, compared to the figure a year earlier.

On the cost front, the cost of sales to sales ratio worsened by 1.2% from a year earlier to 70.4% because of increased fixed costs in conjunction with the investments for the future growth.

As to selling, general and administrative expenses, the THK Group made endeavors to contain costs and improve operating efficiency while sales were increasing. However, ratio to net sales worsened by 1.4% from a year earlier to 19.0% due to ¥ 1,262 million of the related costs of the aforementioned business transfer.

As a result, operating income decreased from a year earlier by ¥2,932 million, or 13.8%, to ¥18,293 million.

Ratio to net sales dropped by 2.6% to 10.6%.

Total non-operating income was ¥1,831 million. Major components of non-operating income were ¥571 million of equity earnings of affiliates and ¥311 million of interest income. Total non-operating expense was ¥2,915 million. The major components of non-operating expenses were ¥2,266 million of foreign exchange loss (net) and ¥314 million of interest expenses. As a result, ordinary income decreased from a year earlier by ¥9,235 million, or 34.9%, to ¥17,210 million. Net income attributable to owners of the parent for the nine-month period also decreased from a year earlier by ¥6,931 million, or 38.0%, to ¥11,322 million.

### **Segment Information**

(Japan)

In Japan, the economy made a mild recovery; however, there were some weaknesses particularly in production and exports. In such a situation, the THK Group operated proactively and cultivated new business fields such as seismic isolation and damping systems; however, sales dropped by ¥2,150 million, or 2.4%, to ¥88,076 million, compared to the figure a year earlier. This was mainly attributable to the decreased demand for small machine tool products and electronics-related products that had been driven by the investments related to smart phones. Operating income (segment income) amounted to ¥15,463 million, down ¥2,137 million, or 12.1%, from the figure a year earlier due mainly to the decreased sales.

(The Americas)

In the Americas, despite the strong consumer spending, there were some weaknesses particularly in exports. In such a situation, the production and sales sections worked in unison to expand and deepen transactions with existing customers and to cultivate new business fields such as medical equipment, aircraft, and energy-related business. Because of these endeavors, the THK Group successfully increased its sales to the general machine industry and the transportation equipment industry. Along with the impact of two TRA subsidiaries consolidated since the third quarter period and the favorable effect of the weaker yen as compared to the level a year earlier, net sales for the nine-month period amounted to ¥33,049 million, up ¥7,817 million, or 31.0%, from the figure a year earlier. Operating income (segment income) amounted to ¥1,956 million, up ¥785 million, or 67.1%, from the figure a year earlier.

(Europe)

In Europe, the signs of recovery were continuously seen. In such a situation, the production and sales sections proactively worked in unison to expand transactions with existing customers and to cultivate new business fields such as aircraft, railway vehicle-related, household goods, and space-defense business. Consequently, the THK Group successfully increased its sales, especially to the machine tool industry.

Along with the impact of two TRA subsidiaries consolidated since the third quarter period, sales in Europe amounted to ¥19,527 million, up ¥4,099 million, or 26.6%, from the figure a year earlier. Operating income (segment income) dropped to ¥856 million, down ¥584 million, or 40.6%, due mainly to proactive measures implemented for the future growth..

(China)

In China, while the economic growth slowed down, the THK Group's products were getting widely adopted because of the factory automation progress brought by the shortage in labor and the hike in personnel expenses in China. In such a situation, the THK Group implemented aggressive business activities with its strengthened sales channels. Along with the favorable effect of the weaker yen as compared to the level a year earlier, sales amounted to ¥22,168 million, up ¥2,103 million, or 10.5%, from the figure a year earlier. However, the THK Group recorded ¥530 million of operating loss (segment loss), a turnaround of ¥1,053 million from operating income (segment income) recorded in a year earlier, due mainly to proactive investments for the future growth.

(Other)

In other countries and regions, the THK Group continued to expand and deepen transactions with existing customers and to cultivate new customers while expanding its sales channels by setting up a new business hub in India and customer support centers in the ASEAN countries. Along with the favorable effect of the weaker yen as compared to the level a year earlier, net sales for the nine-month period amounted to ¥9,911 million, up ¥564 million, or 6.0%, from the figure a year earlier. Operating income (segment income) amounted to ¥1,073 million, up ¥115 million, or 12.1%, from the figure a year earlier.

## **2. Financial position (As of December 31, 2015)**

Total assets stood at ¥403,001 million, ¥29,390 million more than the previous fiscal year-end, due mainly to a combined effect of increase in accounts and notes receivable by ¥8,856 million, increase in merchandise and finished goods by ¥3,267 million, increase in work in process by ¥1,393 million, increase in raw materials and supplies by ¥3,151 million, increase in machinery and equipment (net) by ¥5,579 million, increase in goodwill by ¥32,664 million, and decrease in cash and cash equivalents by ¥31,771 million.

THK recorded goodwill that arose in relation to the business transfer of the linkage and suspension business of TRW in Europe and North America and purchase of shares of TRW subsidiary. Because allocation of the acquisition costs was not completed at the end of the third quarter period, the amount of the goodwill has been provisionally determined.

Total liabilities stood at ¥152,978 million, ¥29,866 million more than the previous fiscal year-end, due mainly to a combined effect of increase in accounts and notes payable by ¥7,151 million, increase in short-term bank loans by ¥24,097 million, increase in bonds by ¥10,000 million, decrease in current portion of long-term bonds by ¥7,000 million, and decrease in income taxes payable by ¥5,903 million.

Net assets stood at ¥250,023 million, ¥475 million less than the previous fiscal year-end, due mainly to a combined effect of increase in retained earnings by ¥4,360 million and decrease in foreign currency translation adjustments by ¥5,190 million.

## **3. Forecast for the fiscal year ending March 31, 2016**

For details of the financial forecasts for the year ending March 31, 2016, please refer to “Notice Regarding the Amendments in Financial Forecasts” announced on February 10, 2016.
