

Getting You Products Fast with Quick Ship

While manufacturing lead times have been high industry-wide, our customers continue to experience the benefits of product availability.

Here at THK America, we understand that our customers have tight project schedules with important deadlines. That's why we developed the **Quick Ship Program**, which allows you to **get the high-quality THK parts you need – when you need them!**

▶ DOMESTIC MANUFACTURING FOR THE WIN!

Our [Quick Ship Program](#) is made possible by our **400,000 square foot manufacturing facility in Hebron, Ohio**: THK Manufacturing of America (TMA). TMA produces the majority of THK linear motion guides sold in North America, and it's this industry-leading domestic manufacturer that allows us to keep our most popular products in stock within the United States. **Additionally, recent automation efforts undertaken by TMA have increased our production capabilities even more.**

TMA in Hebron, OH

Products that are in stock can be **shipped from Ohio in as little as 1 to 3 days**, and **overnight shipping is available** in most locations.

QUICK SHIP PRODUCT AVAILABILITY
